Conference Agree.

(By telegraph to the Dispatch.)

Washington, February 9.—The conferences on the diplomatic and consular appropriate members of the Committee on Ways and Means have been earnessly consulting and working upon the tariff bill, and the present expectation is that they will be able to report to the Hause upon the Secate amendments next Tuesday. The indications are that the report will be confined to the recommendation that the Senate amend-

meats be rejected for reasons stated. It will argue (upon the basis of Treasury figuring) that when an account is taken of the operation of the package clause and the other administrative features of the bid, as well as of the amendments whose effects cannot be stated in advance, but which must result in account revenue the bad may revenue the treasure of the property of the state of the stat stated in advance, but which must result in increased revenue, the total gross reduction made by the bill as it came from the Senate (exclusive of the internal-revenue sections) will not exceed \$5.000,000. Without taking an account of these items, a Tressury statistician placed the reduction at about \$13.000,000. So the report will argue that the Senate's reconsistion means to take \$28.000. Senate's proposition means to take \$28,000,the taxes on other con

RICHMOND TOBACCO MARKET.

FREELARY 9, 1889.

The week has been characterized by a fairly active market for good manufacturing old stock for home work, as well as a good buying for outsitle orders, indicating that plug men are not overburdened with leaf. While the new crop does not not improve the old appears by contrast better every day, hence we may appear a fairly active market all through February.

West Virginia brights have fallen off in quality, quantity, and color this week, with but little more fine grades expected from this or any source in new brights. Interior markets mean while show no better grades, only a small sprinkling of brights, while medium good stock holds up well in prices.

Dark leaf was without change, with 9%c, highers of the week, old wrappears have been active.
